

First Iteration Report

Bisola Alugbin, Pawel Przybysz, John Tao, Parker Winchester

3/16/2012

User stories completed:

- Drawing to the canvas.
- Naming and saving user-created characters.
- Tagging.

Project velocity: Not as fast as expected. Problems occurred when attempting to use Adapters to have the character library read by the Android device and turned into a ListView component.

User stories that are incomplete:

- Selecting a Character from the library – Application crashes when attempting to read from the library.
- Replaying a drawn character's motions – Inability to access the library keeps this function from being properly implemented.
-
